

Report 1. Identification of the purpose of the website to the appropriate stakeholders

Introduction

This report defines the goal and target market of the proposed website to be developed for the theme park. By realizing the website's goals, we ensure that all the parties for whom this information is important will realize its relevance.

1. Primary goals

The website is intended to be informative for clients interested in investing in the Park. Its primary goals include:

Ticketing Information:

- Include simple and clear price information for different ages and different types of tickets.
- Adduce characteristics related to each type of ticket (e.g., restricted to certain attractions, right of boarding first).
- Rides and Attractions: Provide a general description of any attractions or rides in the theme park. Explain the levels of fun and any limitations (for example, by height or age).
- Cover the aspects relating to accessibility of the address for guests with disabilities.

Park Information:

- Include phone number/s, address, operational time, and/or seasons when the park is closed or has limited operations.
- Provide an easy-to-use, machine-readable index through which customers can search for answers to their most frequently asked questions.
- Inform people about rules enforced in the park, safety measures to be taken, and the policies to be followed in case of the loss of property.
- Include the history of the park and its goals and objectives.

Food Options:

- Enlist all the options for places where people could get their dishes served within the park (restaurants, cafes, snack bars).
- This is where you will enter your dietary preferences, such as Vegetarian, Vegan, Gluten-free, etc.

Location Details:

- Inform the attendees of their transportation undertaking: public transport, parking space and shuttle services.

- Explain the park's geographical location and the major features around the park such as buildings or institutions.

2. Stakeholders

The following stakeholders will benefit from the website:

- **Visitors and Potential Customers:** they look for information on ticket prices for the respective parks, park rides, park attractions, and available amenities, among other things. It should interest and convince them to pay the park a visit.
- **Investors and Business Partners:** This also implies that investors require clear information on the services that the park will offer and the likely revenues that it will generate. There are restrictions based on the unique nature of the park such that business partners like food vendors and sponsors seek exposure and association with the park's brand.
- **Guests with Disabilities:** The hearing impaired require accessibility information that they can use when planning their visit.

Conclusively, the website is useful to stakeholders since it contains crucial information regarding the theme park, such as its services and location. Hence, catering to diverse audiences, the website enhances the perceived visit quality and adds value to the park's mission.

Report 2. Analysis of 5 theme park web sites

We analyzed 7 theme park websites and learned the below lessons for the new site:

- **Effective Features:** Navigation Clarity.
Lessons for the New Site: Make sure the ticket drop-down list is well-located and not difficult to find. Do not include features that may draw the user's attention to other parts of the site, such as videos that start automatically.
Application: To create easy and simple navigation with proper positioning of the most significant links.
- **Effective Features:** Information Presentation & Ticket Booking Experience.
Lessons for the New Site: 1. Ticket information should be organized; 2. Make ticket booking easy; 3. Use the margin between headers for more content related to the topic.
Application: 1. A concept of attractive and easy-to-use card-of-feeing ticket booking; 2. Design an appealing and informative section for the rides, priority boarding, and special events. To cover both the users using their desktop and mobile phone.
- **Effective Features:** User Parameters and Personalization.
Lessons for New Site: Introduction of individual characteristics, including attraction, food, and guide options.
Application: Deploy interfaces that are engaging and adapt recommendations to the users.

Hey guys, I have been away since the creation of this chat, sorry for not replying back and not being responsive, as I was studying cm1040 😊

Report 4. Identification of appropriate structure for the website

After we decided on the website's content, we quickly reached a consensus on its structure. The website will focus on three items: tickets, attractions, and services. So, we will present the three items on the home page and set up separate web pages for each. Based on the lessons we learned from Report 2, we also agreed to place the ticket information on the homepage's most prominent location. We split the work among our team members accordingly.

[@James Clarke](#) [@Leon Li](#) [@Muhammed](#)

Hello, mates. I think I am **done with wireframes**, you can start develop. I attach link to [Github Repo](#). But I still need your github profiles to add you to the repo.

Please consider attached git branch strategy.

I think each of us will take a single page to develop, so just git checkout the page branch you want to develop. Alternatively, if you're working together on one page, please create a separate feature branch from the page branch you're working on and merge it back into the page branch at the end. (If you don't quite understand what I mean, please reach out to me via DM.)

Hope everyone has a fantastic day! (edited)

Report 5. Wireframes as a clear model for the website

We made wireframes for the “Homepage,” “Ticketing page,” and “Service page” by using Figma. The wireframes are attached the below for your reference:

<https://www.figma.com/file/uWoVbzWxxOQHINotWbuw3I/Theme-park-Wireframes?type=design&node-id=0%3A1&mode=design&t=MNaWLajlbSbKw6Zr-1>

List of content

- 1 Child Tracking Bands
 - How to Get One
 - Peace of Mind for Your Visit
- 2 Rest and Recharge Pods
 - How to Use the Rest and Recharge Pods
 - Ideal for Every Member of the Family
- 3 Emergency Medical Services
 - How to Access Our Emergency Medical Services
 - Rest Assured During Your Visit

Services and Amenities:

☒ Child Tracking Bands

Keep track of your little adventurers with our state-of-the-art tracking bands. These comfortable, wearable devices help you monitor your child's location within the park at all times via our Galaxy Kids Park app.

How to Get One:

Upon entering Galaxy Kids Park, visit our Guest Services booth to pick up and register your child's tracking band. Our staff will help you set up the Galaxy Kids Park app on your device, pair the band, and show you how to customize settings for your family's needs.

Peace of Mind for Your Visit:

The Child Tracking Bands at Galaxy Kids Park allow your children the freedom to explore in a controlled and secure environment, making your visit stress-free and enjoyable for the whole family. Enjoy the park, indulge in the attractions, and relax knowing your little ones are just a tap away on your device.

☒ Rest and Recharge Pods:

Explore our family-friendly Rest and Recharge Pods, where you can take a break in a quiet, comfortable setting designed to mimic the peaceful expense of space. Perfect for naps or just a little downtime.

How to Use the Rest and Recharge Pods:

No need for reservations – our pods are available on a first-come, first-served basis. Simply enter a vacant pod and settle in. Each pod is designed for short-term use, allowing every family the opportunity to enjoy this unique facility.

Ideal for Every Member of the Family:

Whether it's the little ones needing a nap, teenagers seeking a moment to disconnect with some digital content, or parents looking for a moment of peace, the Rest and Recharge Pods are designed to meet the needs of all ages and preferences. At Galaxy Kids Park, we understand that a great day out can be long. Our Rest and Recharge Pods provide the perfect space to take a break, ensuring that your family's adventure can continue with everyone feeling refreshed and rejuvenated.

☒ Emergency Medical Services: Ensuring Health and Safety for Our Young Explorers

How to Access Our Emergency Medical Services:

If you require medical assistance, you can visit any of our medical stations directly, or contact any park staff member. For urgent situations, our park is equipped with emergency call points and a dedicated medical response team ready to come to your location within the park.

Rest Assured During Your Visit:

While we hope your visit is free from mishaps, our Emergency Medical Services are here to handle any situation with care and expertise. At Galaxy Kids Park, we are committed to ensuring that your adventure is not only exciting but also safe, letting you focus on making memorable moments with your family.
